

Scam Alert: If you receive this letter, please know it is NOT legitimate. There is no actual way to submit the payment they claim is owed, the double logo is unusual, the boxed logo is not one we use, and the watermark is off. If you have any questions, email inquiries@com.ohio.gov.

Approved Designated Laboratories

[Collapse All Sections](#) 

What is an Approved Designated Laboratory and what do they do?

Ohio Revised Code 3713.08 states that prior to the sale of bedding, stuffed toys, and upholstered furniture the material content of products must be tested and analyzed at an established laboratory.

Blended fibers are typically found in mattresses, but also appear in filling materials for pillow shams, quilts, and various other products. Designated laboratories are laboratories which must have the ability to test blended fiber products and report the findings to our office. Below is the list of Approved Designated Testing Laboratories for the state of Ohio.

Please note: By definition, a blended fiber is two or more products of different genera incorporated in the processing of filling materials. The percentage of each is required to be listed on the law in the approved formatting. To explain further, a blended fiber consists of two or more fibers combined to make a singular filling material, such as the fire barrier batting used in mattresses typically comprised of rayon/polyester.

If you are submitting sample to our office for testing that does not contain blended fibers, please refer to the instructions provided in the “Annual Bedding License Application” link located under the “How To Apply For A License In Ohio” section.

Please contact the specific designated laboratory that you will be using to obtain instructions regarding the submission of your sample. Each laboratory has their own set of capabilities and requirements.

China

SGS-CSTC Standards Technical Services Co., LTD. Shenzhen Branch Testing Center

Room 101-901, Plant 4 & Room 101, Plant 2 & Room 101, Plant 3& Room 301-501, Plant 3,
